

REMARKS

Applicant requests amendment of claim 1 to ensure that every term of the claims has proper antecedent basis. It is requested that the language of one paragraph of that claim be restored to essentially the corresponding original language of the claim so that there are not two different terminals both referred to as first terminals and two other terminals both other terminals both referred to as second terminals. There is no substantive amendment of the claim which merely deals with formality issues.

In response to the Reasons for Allowance, Applicant notes that there is a typographical error in the sixth line of the lengthy paragraph appearing on page 2 of the communication supplied with the Notice of Allowance. In that line, in transcribing the language of claim 1, the word "winding" was typed where it was intended to type "wiring".

A favorable action on the requested Amendment after Allowance is earnestly solicited.

Respectfully submitted,

Jeffrey A. Wyand, Reg. No. 29,458
